Contents

Introduction

The data for analysis was taken from the: <http://open.canada.ca/data> ¹

Short Summary

Through all glaciers the shortest history of observations has: *Helm Glacier - southern Coast Mountains (Garibaldi Provincial Park), British Columbia*

Also, the glacier, which has median value of changes the most close to zero, calls: *Meighen Ice Cap - Meighen Island, Nunavut*

The only missing value of observation has history of the glacier calls *Helm Glacier - southern Coast Mountains (Garibaldi Provincial Park), British Columbia*
